

# Research on Merger Remedies

## Abstract

Keywords: merger, merger remedies, structural remedies, behavioral remedies, information asymmetry, corporate divestiture, monitoring cost, irreversibility, Fair Trade Law

“Merger remedies” is a commonly used mechanism by major competition enforcement agencies around the world. “Structural” or “behavioral” remedial measures employed under this mechanism serve principally to maintain or restore competition after mergers. Also, the imposition upon merging parties the obligation to adopt those measures facilitates the realization of the goals for merger control under the competition law. Given that the Fair Trade Law of Chinese Taipei has authorized the Fair Trade Commission to apply merger remedies.
